

Questions & Answers

OZZI KLEEN

Domestic Sewage Treatment Systems

- How much does the Ozzi Kleen cost to run?** The Ozzi Kleen is extremely cost efficient. Due to the unique Ozzi Kleen process the system is not running continuously. Power costs are approximately 25 cents per day.
- What area is needed for irrigation?** The extent of irrigation differs from site to site, as it is determined by the household size, slope, location and soil types. Your Geo Tech will advise you on the irrigation area required.
- How much water is irrigated onto the gardens/lawn?** The total amount of water you use in the household is the amount of water that automatically irrigates your garden.
- Does the irrigation water smell?** No. The Ozzi Kleen oxygenated treatment process does not allow for any septic process to take place which can produce dissolved sulphides and other odours.
- Can you get infections from the irrigated water?** The treated water quality from an Ozzi Kleen conforms with the Australian Standards AS1547. Chlorine is used for disinfection which is an accepted practice in both small and city/town treatment plants.
- What type of chlorine is used?** Calcium hypo chlorite in tablet form. The concentration of chlorine used is less than that of town drinking water.
- How far away from the house can the Ozzi Kleen be?** There is no minimum or maximum distance required as long as it has the right fall ie 1 in 60.
- How often is the Ozzi Kleen serviced?** A service is carried out every 3 months. Results from the tests for water purity and system efficiency are provided to you and your local government. The service will be carried out by an Ozzi Kleen authorised agent.
- What if something goes wrong?** We offer a full manufacture's warranty. If something goes wrong, check the troubleshooting guide in the Owner's Manual. If the problem can not be rectified please phone your local agent.
- Does a manual come with the Ozzi Kleen?** Yes. The Owner's Manual can be found in the motor box, it is very informative telling you all you need to know about how your Ozzi Kleen works.
- Does the Ozzi Kleen need pumping out?** Under normal circumstances the Ozzi Kleen should never require pumping out.
- What is grey water?** Grey water is all your household waste water not containing the toilet connection. Grey water when stored for 12 hours is equal in bacterial content to normal raw sewage.
